TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java

Frontend Technologies: HTML5, CSS3, React.js, Next.js, Redux Toolkit (RTK, RTK Query), Styled-Components, Micro-Frontends, Module Federation, Tailwind CSS, SCSS, React Hook Form, TanStack, Webpack, Framer Motion

Backend Technologies: Node.js, Express.js, MongoDB, MySQL, GraphQL

Developer Tools: Git, Postman, VS Code, JIRA, Jenkins, Docker, AWS(S3, cloudFront), Figma, Storybook

QA Tools: Cypress, React Testing Library, Jest, Percy, Selenium, TestNG

EXPERIENCE

Nielsen Media

Apr 2024 – Present

Senior Software Engineer

Bangalore, India

- Maintained and scaled a shared micro-frontend platform (IFL) supporting 100+ applications, implemented multi-React version support, developed user-access-based loading screens, resolved critical widget rendering and screen load issues, and optimized script loading to prevent duplicate DOM injections, reducing base load by 1 second.
- Led integration of Heap analytics in IFL framework to enable analytics across all microfrontend applications, adding browser APIs and custom browser interfaces to manage analytics per app.
- Architected and Implemented Nielsen Creative and Encoding Platform with queue-based, resumable/parallel AWS S3 uploads, exponential backoff retries, byte-range downloads, error handling, and CI/CD pipelines via GitLab.
- Designed and developed the frontend of Media Portal dashboard: consolidated client product access, app discovery, user impersonation, and a workspace with file sharing and URL-based links
- Modernized Nielsen's Components Design System by delivering key reusable React 18 components, increasing developer efficiency and UI consistency across projects.
- Contributed and maintained a self-service admin app within the Media Application Framework (MAF), building key screens for app details, screen lists, entry points, products, analytics panels, and a app list with search and filter features.
- Led a team of 3 engineers, planning sprints and mentoring junior members, while resolving complex UI issues.
- Technologies: TypeScript, JavaScript, React.js, Redux Toolkit, RTK Query, styled-components, Cypress, Node.js, Express.js, MySQL, REST, GitLab, Docker, Nginx, Heap Analytics, AWS (S3, CloudFront)

Publicis Resources

Mar 2023 – Apr 2024

Associate Technology L1

Bangalore, India

- Developed UI for a customizable alumni package application in Next.js and onboarded an agency.
- Reduced initial load time by 40% by consolidating multiple token API calls into a single request and caching tokens.
- Leveraged dynamic imports of Next.js, react lazy loading, and lazySizes library, reducing the initial bundle size.
- Implemented user-friendly feed section enabling post, edit, and deleting feed items, with reactions and comments section.
- Implemented GraphQL queries using Apollo Client to optimize API calls, enhancing efficiency and data retrieval.
- Collaborated with the design team in creating and developing Alumni Admin screen to send bulk invites to alumni.
- Contributed to Marcel-Component-Library repository to create re-usable components.
- Implemented fix for security related issues including application test script detection and cross-site scripting
- Technologies: JavaScript, React.js, Redux, Next.js, Node.js, Express.js, SCSS, Jest, AEM, REST, GraphQL

Infosys

Nov2020 – Nov 2022

Systems Engineer

Bangalore, India

- Developed and maintained Automation Scripts for a Financial services company using TestNG and Selenium.
- Created and enhanced numerous test scripts to handle changes in the objects, in the tested application's GUI, and in the PROD environment using Selenium WebDriver and increased script stability by 22%.
- Developed UI dashboards for test logs and reports, maintained REST APIs for internal tooling.
- Implemented automation scripts for unit testing using TestNG and Selenium.
- Technologies: Java, Spring JavaScript, React.js, jest, TestNG, Selenium, REST, MySQL.

PROJECTS

XFlix

JavaScript, React.js, CSS, MUI, Node.js, Express.js, MongoDB | [link](#) | [source code - FE](#) | [source code - BE](#)

- Built a video-sharing platform that hosts videos for the world to watch. It features uploading new videos by using external video links. with search, sort, and filter functionalities for customized and efficient data retrievals.
- Engineered backend REST APIs with Node.js and MongoDB, employing Joi validation to ensure robust data integrity.

QKart

JavaScript, React.js, CSS, MUI, Jest, Node.js, Express.js, MongoDB | [link](#) | [source code - FE](#) | [source code - BE](#)

- Built a secure e-commerce platform featuring authentication, shopping cart, and checkout capabilities by implementing JWT-based authorization with Passport middleware and enhanced search functionality optimized through debounce.

EDUCATION

Acharya institute of technology

Jul 2016 - Jun 2020

BE in Information Science and Engineering | GPA: 7.91
